Temuri T.

takalandzet@gmail.com
Tbilisi, Georgia

Summary

- I am a Software Engineer with solid experience in Back-End development. For years, my main languages have been PHP and Python.
- I am currently in love with Go. I use this language to develop my WEB and CLI-based applications. Also, Go's performance and scalability allow me to deploy reliable cloud-native applications.
- I am the author and maintainer of several PHP libraries and Drupal modules.
- My Library "gen-md" is a winner of the PHP Innovation Award.
- Also, I am the creator of the local online competition system for learning programming - Informatics.Ge which has thousands of active users.
- I love to contribute to Open Source Projects. My commits are merged in notable projects and companies such as Symfony, phpMyAdmin, Slim Framework, Composer, Wodby, Imbo, ThePHPLeague, etc.
- In addition to contributing to other projects, I have many Open Source projects of my own (you can check them in the Projects section).
- Besides Software Development I have good knowledge and experience in DevOps, more specifically in Automation, Containerisation/Dockerization, Continuous Integration and Deployment, Monitoring, and Automatic testing.
- I enjoy working with AWS and Kubernetes.
- My best friends in IaC and CaC are Terraform and Ansible.

Skills

Go, Gin, GORM, Cobra, GoReleaser, golangci, Python, Flask, FastAPI, PHP, Symfony, Drupal, Linux, Docker, Docker Compose, Kubernetes, Rancher, AWS, Terraform, Ansible, Grafana, Hashura, Jenkins, RabbitMQ, Kafka, Redis, etcd, MySQL, PostgreSQL, MongoDB
